PORTFOLIO · LIVE WORK

drewwork6-source.github.io

65+ shipped
sites, apps & tools

01 SUMMARY

Software engineer and freelance founder who has shipped **65+ live websites, apps, and automation tools** for small businesses. I run the entire cycle myself — cold outreach, scoping, design, build, deploy, and long-term support — with no one managing me. Recent work spans a React Native marketplace app, a real-time AI voice agent built on Twilio and Claude, and headless-browser lead tooling. Comfortable across the full stack and good at turning what a business owner actually needs into working software.

02 EXPERIENCE

Founder & Developer — Freelance

2023 — PRESENT

- Sourced and closed local small-business clients, running the **full sales cycle** from cold outreach to signed contract.
- Shipped **65+ responsive sites and interactive demos** end to end — scoping, design, development, deployment, and post-launch support.
- Built AI automation tools including chatbots, intake workflows, and content pipelines that cut repetitive manual work for clients.
- Integrated web forms with email platforms, CRMs, and third-party APIs so owners can run more of their operation online.
- Owned all client communication, scope, and timelines solo, maintaining and updating sites long after launch.

03 SELECTED PROJECTS

ChoreNextDoor — Mobile Marketplace App github.com/drewwork6-source/ChoreNextDoor-app ↗

Neighborhood chore marketplace with dual homeowner/chorer flows, full chore lifecycle, threaded messaging, ratings, and verification badges.

React Native · Expo · React Navigation · AsyncStorage

Medical Office Voice Bot — Real-Time AI Agent github.com/drewwork6-source/voice-bot ↗

Outbound calling agent that phones a medical office's AI receptionist, role-plays 12 patient scenarios over live audio, transcribes in real time, and auto-generates a bug report on where the target agent broke down. Hand-rolled voice pipeline, no agent framework.

Claude API · Twilio Media Streams · Deepgram · ElevenLabs · FastAPI · WebSockets

The Maze — Interactive 3D Portfolio drewwork6-source.github.io/labyrinth-portfolio ↗

Scroll-driven WebGL labyrinth with beacons marking each turn, resolving into a lamp-lit contact card at the end. Written with no build step.

Three.js · JavaScript · WebGL

Home-Services Lead Scraper github.com/drewwork6-source/leads-scraper ↗

Headless crawler across ~20 cities that surfaces home-service businesses with no existing website and exports sales-ready CSV leads for outreach.

Node.js · Crawllee · Playwright · Apify

Client Sites & Industry Showcases [see all](#) ↗

Shipped production sites for Capital Group (real estate), F&N Waste Removal, Billings Yacht Management, The Turf Factory, Gala's Pool Service, and Lee County Landscaping, plus design showcases for HVAC, restaurant, and barbershop verticals.

React · Next.js · WordPress · Responsive Design
