SKILLS

Languages

JavaScript · TypeScript · Python · Java · SQL ·
HTML · CSS

Frontend

React · Next.js · Three.js · Responsive Design

Mobile

React Native · Expo · React Navigation

Backend & APIs

Node.js · FastAPI · REST APIs · WebSockets

AI & Automation

Claude API · real-time voice pipelines · Twilio ·
Deepgram · ElevenLabs

Data & Scraping

Playwright · Crawlee · Apify

Tools & Platforms

Git · GitHub Pages · WordPress · Webflow ·
Figma

Business

Client acquisition · sales · scoping · client
communication

EDUCATION

B.S. Finance

Florida Gulf Coast University
Minor in Integrated Studies

Graduated 2026

ATHLETICS

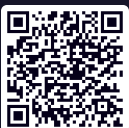

FGCU Baseball

Division I student-athlete who balanced a full
course load while running a freelance
business.

ENGINEERING

Self-taught, client-tested

Finance degree, engineer by practice. Every
tool listed above was learned by shipping
paid production work, not coursework.

PORTFOLIO · LIVE WORK

drewwork6-source.github.io

65+ shipped
sites, apps & tools

01 SUMMARY

Software engineer and freelance founder who has shipped **65+ live websites, apps, and automation tools** for small businesses. My degree is in finance — **I learned to build by building**, and have shipped production software for paying clients since 2023. I run the entire cycle myself: cold outreach, scoping, design, build, deploy, and long-term support. Recent work spans a React Native marketplace app, a real-time AI voice agent on Twilio and Claude, and headless-browser lead tooling — turning what a business owner actually needs into working software.

02 EXPERIENCE

Founder & Developer — Freelance

2023 — PRESENT

- Shipped **65+ responsive sites, apps, and interactive demos** end to end — scoping, design, development, deployment, and post-launch support.
- Closed local small-business clients solo, owning the **full sales cycle** from cold outreach to signed contract.
- Built AI automation tools — chatbots, intake workflows, and content pipelines — that removed recurring manual work from client operations.
- Wired client sites into email platforms, CRMs, and third-party APIs, moving more of each owner's day-to-day operation online.
- Ran scope, timelines, and every client conversation without oversight, maintaining sites long past launch.

AI Training & Evaluation — Handshake AI · Uber AI Solutions

2025 — 2026

- Authored expert-level **coding prompts** used to train and evaluate large language models.
- Debugged and corrected model-generated code, documenting where the model's reasoning broke down.
- Scored model responses against detailed rubrics, producing consistent high-signal training data at volume.

03 SELECTED PROJECTS

Client Sites & Industry Showcases [see all](#) ↗

Shipped production sites for Capital Group (real estate), F&N Waste Removal, Billings Yacht Management, The Turf Factory, Gala's Pool Service, and Lee County Landscaping, plus design showcases for HVAC, restaurant, and barbershop verticals.

React · Next.js · WordPress · Responsive Design

ChoreNextDoor — Mobile Marketplace App github.com/drewwork6-source/ChoreNextDoor-app ↗

Neighborhood chore marketplace with dual homeowner/chorer flows, full chore lifecycle, threaded messaging, ratings, and verification badges.

React Native · Expo · React Navigation · AsyncStorage

Medical Office Voice Bot — Real-Time AI Agent github.com/drewwork6-source/voice-bot ↗

Outbound calling agent that phones a medical office's AI receptionist, role-plays 12 patient scenarios over live audio, transcribes in real time, and auto-generates a bug report on where the target agent broke down. Hand-rolled voice pipeline, no agent framework.

Claude API · Twilio Media Streams · Deepgram · ElevenLabs · FastAPI · WebSockets

The Maze — Interactive 3D Portfolio drewwork6-source.github.io/labyrinth-portfolio ↗

Scroll-driven WebGL labyrinth with beacons marking each turn, resolving into a lamp-lit contact card at the end. Written with no build step.

Three.js · JavaScript · WebGL

Home-Services Lead Scraper github.com/drewwork6-source/leads-scraper ↗

Headless crawler across ~20 cities that surfaces home-service businesses with no existing website and exports sales-ready CSV leads for outreach.

Node.js · Crawlee · Playwright · Apify
